SUMMARY

Graduate student in mathematics working on coding theory and finite fields. My research focuses on generalized covering radii of linear codes, using tools from finite fields and algebraic curves.

EDUCATION

M.Sc. in Mathematics Sabancı University Advisor: Prof. Ferruh Özbudak. Full Scholarship, supported by TÜBİTAK	2024 – Present
B.S. in Mathematics Galatasaray University Advisor: Assistant Prof. Can Ozan Oğuz. GPA: 3.79/4.00, First-rank student	2019 – 2024

PUBLICATIONS

The Third Generalized Covering Radius for Binary Primitive Double-Error-Correcting BCH Codes
with Ferruh Özbudak, *Finite Fields and Their Applications*, published.
DOI: <https://doi.org/10.1016/j.ffa.2025.102749>

On the Second Generalized Covering Radius for Binary Primitive Triple-Error-Correcting BCH Codes
with Ferruh Özbudak, submitted.

CONFERENCES

ANTS XVII – Seventeenth Algorithmic Number Theory Symposium University of Groningen, Groningen, The Netherlands.	July 2026
Workshop on Codes, Orthogonal Arrays and Related Areas Sabancı University, Istanbul, Türkiye.	October 2025

WORK EXPERIENCE

Research Assistant Department of Mathematics, Galatasaray University I work as a research assistant in the Department of Mathematics.	February 2026 – Present
--	-------------------------

TEACHING

Linear Algebra Research Assistant at Galatasaray University, leading recitation sessions for Linear Algebra.	Spring 2026
Linear Algebra Teaching Assistant at Sabancı University.	Fall 2024 & Fall 2025
Introduction to Algebra Teaching Assistant at Sabancı University.	Spring 2024

SCHOLARSHIPS

Sabancı University Full Scholarship Supported by TÜBİTAK.	2024 – 2026
Türk Eğitim Vakfı (TEV) Undergraduate scholarship.	2020 – 2024

UNDERGRADUATE ACTIVITIES

Direct Reading Project (DRP Turkey) Experience on reading, researching, and giving a presentation about root systems. Link and Video	Summer 2023
Undergraduate Thesis My undergraduate thesis focuses on the algebraic representation of neural networks. Report	Summer 2024
